

The Federal Communications Commission

Dear The Federal Communications Commission,

I have 3 kids and I don't want to be without a wireless phone when I am on the road. You are trying to take my security away because I cannot afford to keep it if you keep raising taxes. I think that there are those that are trying to rip people off and keep getting money any way that they can. I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Deborah Tackett
